

Report of Dr. Cristovam Scapulatempo Neto's Training
at Brigham and Woman's Hospital, Boston USA

To WASPaLM

I would like to thank everybody for the opportunity.

I spent one month at hematopathology service from Brigham and Womans Hospital. I've learn a lot. I had contact with very good people and professionals. The daily routine was exciting because of the challenge cases.

I'm certains that the acquired knowledge will be very well used from the cases of Barretos Cancer Hospital, an institution deddicated to treat patients with cancer for free with quality.

Thanks a lot again

Waspalm is in my mind everyday helping me to help my dear patients.

Best regards

Cristovam Scapulatempo Neto
